

NVG meeting 2016 program

Fine Activity Docation Magdalena zaal Magdalena zaa	Wednesday November 30			
PhD meeting Registration Registration Registration Cenakel Buildin Conget				
Cenakel Buildin Comparison Cenakel Buildin Counge				
Rison-20:00 Dinner			_	
Dinner Winter Garden	17:00-18:00	Registration	0,	
Cecilia Chapel BRILL Baerends lecture – sponsored by BRILL Publishers Marla Sokolowski, Dept. of Ecology and Evolutionary Biology, University of Toronto Unravelling Gene-Environment Interplay on Behaviour Winter Garden Thursday December 1 Si00-9:00 Breakfast (closed meeting for NVG committee) Winter Garden Martien Kas, University of Groningen Linking quantitative biology to neuropsychiatry Cecilia Chapel Moise affects reproductive behaviour in gobies Andrea Soto Padilla, UMCG Behaviour of Adult Drosophila in a Thermally Dynamic Arena Cecilia Chapel Dian Zijlmans, Utrecht University Couch potatoes and sports-monkeys: lack of locomotion, and not food intake, is related to overweight in captive group-housed female rhesus macaques Cecilia Chapel Merel Burgering, Tilburg University Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. Sara Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model Lizao-14:30 Cecilia Chapel				
BRILL Baerends lecture — sponsored by BRILL Publishers Marla Sokolowski, Dept. of Ecology and Evolutionary Biology, University of Toronto Unravelling Gene-Environment Interplay on Behaviour 21:00-23:30 Drinks Winter Garden Fhursday December 1 8:00-9:00 Breakfast (closed meeting for NVG committee) Winter Garden Cecilia Chapel Martien Kas, University of Groningen Linking quantitative biology to neuropsychiatry 10:00-10:30 Coffee and posters Winter Garden 10:30-10:50 Hans Slabbekorn, Leiden University Population consequences of sound impact on fishes 10:50-11:10 Karen de Jong, University of Cologne Noise affects reproductive behaviour in gobies 11:00-11:30 Andrea Soto Padilla, UMCG Behaviour of Adult Drosophila in a Thermally Dynamic Arena 11:30-11:50 Dian Zijlmans, Utrecht University Couch potatoes and sports-monkeys: lack of locomotion, and not food intake, is related to overweight in captive group-housed female rhesus macaques 11:50-12:10 Merel Burgering, Tilburg University Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. 12:10-12:30 Sara Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders — Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model 12:30-13:30 Lunch Astrid Rox, Biomedical Primate Research Centre Female macaques wear the trousers: female fights and female initiated friendships determine immigrant male mating access	18:00-20:00	Dinner		
Marla Sokolowski, Dept. of Ecology and Evolutionary Biology, University of Toronto Unravelling Gene-Environment Interplay on Behaviour Priction-23:30 Drinks Winter Garden Priction-23:30 Drinks Winter Garden Priction-23:30 Breakfast (closed meeting for NVG committee) Coo-10:00 Breakfast (closed meeting for NVG committee) Coo-10:00 Chair: Jean-Christophe Billeter Martien Kas, University of Groningen Linking quantitative biology to neuropsychiatry Coo-10:30 Coffee and posters Winter Garden Cocilia Chapel Population consequences of sound impact on fishes Cecilia Chapel Priction-11:10 Karen de Jong, University of Cologne Noise affects reproductive behaviour in gobies Andrea Soto Padilla, UMCG Behaviour of Adult Drosophilla in a Thermally Dynamic Arena Cecilia Chapel	20:00-21:00	·	Cecilia Chapel	
University of Toronto Unravelling Gene-Environment Interplay on Behaviour Phursday December 1 Si00-9:00 Breakfast (closed meeting for NVG committee) Winter Garden Chair: Jean-Christophe Billeter Martien Kas, University of Groningen Linking quantitative biology to neuropsychiatry Coi00-10:30 Coffee and posters Winter Garden Cecilia Chapel Dian Slabbekoorn, Leiden University Population consequences of sound impact on fishes Cecilia Chapel Noise affects reproductive behaviour in gobies Andrea Soto Padilla, UMCG Behaviour of Adult Drosophila in a Thermally Dynamic Arena Dian Zijlmans, Utrecht University Couch potatoes and sports-monkeys: lack of locomotion, and not food intake, is related to overweight in captive group-housed female rhesus macaques Merel Burgering, Tilburg University Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. Sara Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders - Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model Licao-13:30 Lunch Astrid Rox, Biomedical Primate Research Centre Female macaques wear the trousers: female fights and female initiated friendships determine immigrant male mating access		,		
Unravelling Gene-Environment Interplay on Behaviour Printed December 1 Sion-9:00 Breakfast (closed meeting for NVG committee) Winter Garden Chair: Jean-Christophe Billeter Martien Kas, University of Groningen Linking quantitative biology to neuropsychiatry Cocilia Chapel		· · · · · · · · · · · · · · · · · · ·		
Prince P				
Breakfast (closed meeting for NVG committee) Winter Garden				
Breakfast (closed meeting for NVG committee) Chair: Jean-Christophe Billeter Martien Kas, University of Groningen Linking quantitative biology to neuropsychiatry Cocilia Chapel	21:00-23:30	Drinks	Winter Garden	
Cecilia Chapel Martien Kas, University of Groningen Linking quantitative biology to neuropsychiatry Cooffee and posters Cocilia Chapel Population consequences of sound impact on fishes Karen de Jong, University of Cologne Noise affects reproductive behaviour in gobies Cecilia Chapel Population of Adult Drosophila in a Thermally Dynamic Arena Cecilia Chapel Behaviour of Adult Drosophila in a Thermally Dynamic Arena Cecilia Chapel Couch potatoes and sports-monkeys: lack of locomotion, and not food intake, is related to overweight in captive group-housed female rhesus macaques Merel Burgering, Tilburg University Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. Cecilia Chapel	Thursday	December 1		
Martien Kas, University of Groningen Linking quantitative biology to neuropsychiatry 10:00-10:30 Coffee and posters Winter Garden 10:30-10:50 Hans Slabbekoorn, Leiden University Population consequences of sound impact on fishes 10:50-11:10 Karen de Jong, University of Cologne Noise affects reproductive behaviour in gobies 11:00-11:30 Andrea Soto Padilla, UMCG Behaviour of Adult Drosophila in a Thermally Dynamic Arena 11:30-11:50 Dian Zijlmans, Utrecht University Couch potatoes and sports-monkeys: lack of locomotion, and not food intake, is related to overweight in captive group-housed female rhesus macaques 11:50-12:10 Merel Burgering, Tilburg University Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. 12:10-12:30 Sara Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders - Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model 12:30-13:30 Lunch Winter Garden 13:30-14:30 Posters Winter Garden 14:30-14:50 Chair: Mariska Kret Astrid Rox, Biomedical Primate Research Centre Female macaques wear the trousers: female fights and female initiated friendships determine immigrant male mating access	8:00-9:00	Breakfast (closed meeting for NVG committee)	Winter Garden	
Linking quantitative biology to neuropsychiatry 10:00-10:30 Coffee and posters Winter Garden 10:30-10:50 Hans Slabbekoorn, Leiden University Population consequences of sound impact on fishes 10:50-11:10 Karen de Jong, University of Cologne Noise affects reproductive behaviour in gobies 11:00-11:30 Andrea Soto Padilla, UMCG Behaviour of Adult Drosophila in a Thermally Dynamic Arena Dian Zijlmans, Utrecht University Couch potatoes and sports-monkeys: lack of locomotion, and not food intake, is related to overweight in captive group-housed female rhesus macaques 11:50-12:10 Merel Burgering, Tilburg University Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. 12:10-12:30 Sara Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders – Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model 12:30-13:30 Lunch Minter Garden 13:30-14:30 Posters Winter Garden 14:30-14:50 Chair: Mariska Kret Astrid Rox, Biomedical Primate Research Centre Female macaques wear the trousers: female fights and female initiated friendships determine immigrant male mating access	9:00-10:00	Chair: Jean-Christophe Billeter	Cecilia Chapel	
Comparative study on humans and zebra finches. Cecilia Chapel Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. Cecilia Chapel Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. Cecilia Chapel Cognitive mechanisms underlying speech sound discrimination: a communication in an ASD mouse model Cecilia Chapel Cocilia Chapel Communication in an ASD mouse model Cecilia Chapel Cocilia Chapel Communication in an ASD mouse model Cecilia Chapel Cecilia Chapel Communication in an ASD mouse model Cecilia Chapel Cecilia Chapel Communication in an ASD mouse model Cecilia Chapel Chair: Mariska Kret Cecilia Chapel Chair: Mariska Kret Cecilia Chapel Chair: Mariska Kret Cecilia Chapel Cecilia Chapel Cecilia Chapel Chair: Mariska Kret Cecilia Chapel Cecili		Martien Kas, University of Groningen		
Hans Slabbekoorn, Leiden University		Linking quantitative biology to neuropsychiatry		
Population consequences of sound impact on fishes 10:50-11:10 Karen de Jong, University of Cologne Noise affects reproductive behaviour in gobies 11:00-11:30 Andrea Soto Padilla, UMCG Behaviour of Adult Drosophila in a Thermally Dynamic Arena 11:30-11:50 Dian Zijlmans, Utrecht University Couch potatoes and sports-monkeys: lack of locomotion, and not food intake, is related to overweight in captive group-housed female rhesus macaques 11:50-12:10 Merel Burgering, Tilburg University Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. 12:10-12:30 Sara Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders - Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model 12:30-13:30 Lunch Winter Garden 13:30-14:30 Posters Winter Garden 14:30-14:50 Chair: Mariska Kret Astrid Rox, Biomedical Primate Research Centre Female macaques wear the trousers: female fights and female initiated friendships determine immigrant male mating access	10:00-10:30	Coffee and posters	Winter Garden	
Noise affects reproductive behaviour in gobies Cecilia Chapel	10:30-10:50	Hans Slabbekoorn, Leiden University	Cecilia Chapel	
Noise affects reproductive behaviour in gobies 1:00-11:30 Andrea Soto Padilla, UMCG Behaviour of Adult Drosophila in a Thermally Dynamic Arena 1:30-11:50 Dian Zijlmans, Utrecht University Couch potatoes and sports-monkeys: lack of locomotion, and not food intake, is related to overweight in captive group-housed female rhesus macaques 1:50-12:10 Merel Burgering, Tilburg University Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. 12:10-12:30 Sara Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders - Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model 12:30-13:30 Lunch Winter Garden 13:30-14:50 Chair: Mariska Kret Astrid Rox, Biomedical Primate Research Centre Female macaques wear the trousers: female fights and female initiated friendships determine immigrant male mating access		Population consequences of sound impact on fishes		
Andrea Soto Padilla, UMCG Behaviour of Adult Drosophila in a Thermally Dynamic Arena Dian Zijlmans, Utrecht University Couch potatoes and sports-monkeys: lack of locomotion, and not food intake, is related to overweight in captive group-housed female rhesus macaques Merel Burgering, Tilburg University Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. Sara Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders – Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model Lunch Sexion Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders – Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model Cecilia Chapel Winter Garden Cecilia Chapel Cecilia Chapel Cecilia Chapel Cecilia Chapel Astrid Rox, Biomedical Primate Research Centre Female macaques wear the trousers: female fights and female initiated friendships determine immigrant male mating access	10:50-11:10	Karen de Jong, University of Cologne	Cecilia Chapel	
Andrea Soto Padilla, UMCG Behaviour of Adult Drosophila in a Thermally Dynamic Arena Dian Zijlmans, Utrecht University Couch potatoes and sports-monkeys: lack of locomotion, and not food intake, is related to overweight in captive group-housed female rhesus macaques Merel Burgering, Tilburg University Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. Sara Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders – Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model Lunch Sexion Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders – Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model Cecilia Chapel Winter Garden Cecilia Chapel Cecilia Chapel Cecilia Chapel Cecilia Chapel Astrid Rox, Biomedical Primate Research Centre Female macaques wear the trousers: female fights and female initiated friendships determine immigrant male mating access				
Behaviour of Adult Drosophila in a Thermally Dynamic Arena L1:30-11:50 Dian Zijlmans, Utrecht University Couch potatoes and sports-monkeys: lack of locomotion, and not food intake, is related to overweight in captive group-housed female rhesus macaques L1:50-12:10 Merel Burgering, Tilburg University Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. Sara Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders – Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model Lunch Desters Winter Garden Cecilia Chapel Cecilia Chapel Cecilia Chapel Cecilia Chapel Cecilia Chapel Astrid Rox, Biomedical Primate Research Centre Female macaques wear the trousers: female fights and female initiated friendships determine immigrant male mating access	11:00-11:30		Cecilia Chapel	
Couch potatoes and sports-monkeys: lack of locomotion, and not food intake, is related to overweight in captive group-housed female rhesus macaques 1:50-12:10 Merel Burgering, Tilburg University Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. 12:10-12:30 Sara Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders – Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model 12:30-13:30 Lunch Winter Garden 13:30-14:30 Posters Winter Garden 14:30-14:50 Chair: Mariska Kret Astrid Rox, Biomedical Primate Research Centre Female macaques wear the trousers: female fights and female initiated friendships determine immigrant male mating access				
food intake, is related to overweight in captive group-housed female rhesus macaques 11:50-12:10 Merel Burgering, Tilburg University Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. 12:10-12:30 Sara Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders – Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model 12:30-13:30 Lunch Winter Garden 13:30-14:30 Posters Winter Garden 14:30-14:50 Chair: Mariska Kret Astrid Rox, Biomedical Primate Research Centre Female macaques wear the trousers: female fights and female initiated friendships determine immigrant male mating access	11:30-11:50	Dian Zijlmans, Utrecht University	Cecilia Chapel	
food intake, is related to overweight in captive group-housed female rhesus macaques 11:50-12:10 Merel Burgering, Tilburg University Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. 12:10-12:30 Sara Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders – Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model 12:30-13:30 Lunch Winter Garden 13:30-14:30 Posters Winter Garden 14:30-14:50 Chair: Mariska Kret Astrid Rox, Biomedical Primate Research Centre Female macaques wear the trousers: female fights and female initiated friendships determine immigrant male mating access		Couch potatoes and sports-monkeys: lack of locomotion, and not		
rhesus macaques 11:50-12:10 Merel Burgering, Tilburg University Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. 12:10-12:30 Sara Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders – Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model 12:30-13:30 Lunch Minter Garden 13:30-14:30 Chair: Mariska Kret Astrid Rox, Biomedical Primate Research Centre Female macaques wear the trousers: female fights and female initiated friendships determine immigrant male mating access				
Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. 12:10-12:30 Sara Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders – Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model 12:30-13:30 Lunch Winter Garden 13:30-14:30 Posters Winter Garden 14:30-14:50 Chair: Mariska Kret Astrid Rox, Biomedical Primate Research Centre Female macaques wear the trousers: female fights and female initiated friendships determine immigrant male mating access				
Cognitive mechanisms underlying speech sound discrimination: a comparative study on humans and zebra finches. 12:10-12:30 Sara Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders – Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model 12:30-13:30 Lunch Winter Garden 13:30-14:30 Posters Winter Garden 14:30-14:50 Chair: Mariska Kret Astrid Rox, Biomedical Primate Research Centre Female macaques wear the trousers: female fights and female initiated friendships determine immigrant male mating access	11:50-12:10	Merel Burgering, Tilburg University	Cecilia Chapel	
comparative study on humans and zebra finches. 12:10-12:30 Sara Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders - Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model 12:30-13:30 Lunch Winter Garden 13:30-14:30 Posters Winter Garden 14:30-14:50 Chair: Mariska Kret Astrid Rox, Biomedical Primate Research Centre Female macaques wear the trousers: female fights and female initiated friendships determine immigrant male mating access				
L2:10-12:30 Sara Schaafsma, UMC Utrecht Investigating the three-hit hypothesis of Autism Spectrum Disorders - Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model L2:30-13:30 Lunch Winter Garden L4:30-14:30 Posters Winter Garden Cecilia Chapel Astrid Rox, Biomedical Primate Research Centre Female macaques wear the trousers: female fights and female initiated friendships determine immigrant male mating access		,		
Investigating the three-hit hypothesis of Autism Spectrum Disorders — Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model 12:30-13:30	12:10-12:30		Cecilia Chapel	
- Sex-specific effects of prenatal stress on social behavior and communication in an ASD mouse model 12:30-13:30		, ,		
communication in an ASD mouse model 12:30-13:30

initiated friendships determine immigrant male mating access				
	14:50-15:10		Cecilia Chanel	

	Recognizing conspecifics from faces and behinds in humans and	
	chimpanzees	
15:10-15:30	Evy van Berlo, Leiden University	Cecilia Chapel
13.10-13.30	Emotional expressions in humans and apes	Cecilia Citapei
15:30-15:50	Larissa Straffon, Leiden University	Cecilia Chapel
13.30-13.30	Cultural behaviours as fitness indicators: A critique	Cecilia Citapei
15:50-16:10	Lies Zandberg, Wageningen University	Cecilia Chapel
15.50-10.10	Preference and choice for a mate with similar heterozygosity levels	Cecilia Citapei
	increases reproductive success	
16:10-16:30	Coffee	
	NVG general meeting	Cecilia Chapel
	Dinner	Winter Garden
	Chair: Mariska Kret	Cecilia Chapel
20.00-21.00	Carolyn Declerck, Antwerpen University	Cecilia Chapei
	A neuro-economic approach to understanding human cooperation	
21:00-23:30	Drinks sponsored by Noldus Information Technology	Winter Garden
		willter Garden
Friday Dec		T
9:00-9:20	Chair: Astrid Rox	Cecilia Chapel
	Fabian Heim, Leiden University	
	The Neglected Side of FoxPs - How do they affect auditory	
	perception?	
9:20-9:40	Karan Odom, Leiden University	Cecilia Chapel
	Differences in female and male duetting behavior in a tropical	
	breeding songbird	
9:40-10:00	B. Pralle Kriengwatana, University of St Andrews	Cecilia Chapel
10.00.10.00	Developmental stress affects social information use in aging quail	0 11: 01 1
10:00-10:20	Arne Iserbyt, University of Antwerp	Cecilia Chapel
	Fading parental tasks promote cooperation but do not ease costs of	
10.20 10.45	conflict	M/: at an Candan
	Coffee	Winter Garden
10:45-11:45	Oliver Kruger, Dept. of Behavioural Ecology, University of Bielefeld	Cecilia Chapel
	Title: An integrative approach to life histories in the polymorphic common buzzard	
11.45 12.45		Casilia Chanal
	CCD (Centrale Commissie Dierproeven) Geertje van Mierlo	Cecilia Chapel
12:45-13:40	Lunch	Winter Garden
13:40-14:00	Chair: Evy van Berlo	Cecilia Chapel
	Jesse Rademaker, Utrecht University Maternal effects on brain receptor expression	
14.00 15.00		Casilia Chanal
14:00-15:00	Maaike Kempes, Nederlands Instituut voor Forensische psychiatrie	Cecilia Chapel
	en Psychologie The usefulness of behavioural biology in forensic assessment pro	
	Justitia	
15:00 15:20		Cocilia Chanal
	Prizes for best student talk and best student poster	Cecilia Chapel
15:20	End of meeting - coffee/tea available in the lounge	Winter Garden
